# 출판사 소개

- ✓ 1987년 설립된 기술과학, 의학분야 출판사
- ✓ 100여종의 국제 저널과 매년 120 여종의 단행본을 발행
- ✓ 주제 분야
  - Computer Science, Mathematics, Medicine & Natural Science 등
  - 컴퓨터 인공지능, 공학 분야 위주
  - 의학 특히 임상의학 (암, 신경학, 장애에 대한 재활 관련하여 집중)
- ✓ 원문 제공 년도 : 1987년 ~ 현재
- ✓ 저널 종수 : 88종
- ✓ 저널 이용 홈페이지 : <http://content.iospress.com/>

# Homepage

The screenshot shows the homepage of the IOS Press Content Library. At the top, there is a navigation bar with 'Home', 'Journals', 'Cart', and 'Log in / Register'. A search bar is located below the navigation bar, with a search button and a 'Search syntax help' link. A 'Published between' filter is also present. The main content area features a welcome message and a sidebar with links for 'New website launched', 'Ebooks', 'LIKE us on Facebook!', and 'News'. Below this is a section titled 'Explore by subject:' with nine categories: Medicine & Health, Chemistry, Computer & Communication Sciences, Engineering & Technology, Environmental & Energy Sciences, Architecture & Design, Mathematics & Statistics, and Social & Information Sciences. At the bottom, there are three columns: 'Journals (by number of articles)', 'Article types (by number)', and 'Authors (by number of articles)'. Annotations A through G are placed on the page to highlight specific features.

**Calmodulin Binding Proteins and Alzheimer's Disease**

**Authors:** O'Day, Danton H. | Eshak, Kristeen | Myre, Michael A.

**Abstract:** The small, calcium-sensor protein calmodulin is ubiquitous and has a function in all cell types. Here the literature linking calmodulin to Alzheimer's disease is reviewed. Several experimentally-verified calmodulin-binding proteins are identified, including amyloid-β pla...

## Dementia in Middle-Aged Patients with Schizophrenia

**Authors:** Nicolas, Gaël | Beherec, Laurène | Hannequin, Didier | Opolczynski, Gaëlle | Rothärmel, Maud | Wallon, David | Véra, Pierre | Martinaud, Olivier | Guillin, Olivier | Campion, Dominique

**Abstract:** Background: Although numerous studies have assessed cognitive dysfunction in patients with schizophrenia, very few have focused on the diagnosis of dementia... were to accurately diagnose dementia in a cohort of middle-aged patients... assess the type of dementia. Methods: 96 patients with schizophrenia (40 inpatients, 56 outpatients), aged 50 to 70 years, underwent a psychiatric, neurological and neuropsychological evaluation at baseline and after a 20-month follow-up. We established a procedure to diagnose dementia according to the DSM-IV criteria, using the Mattis Dementia Rating Scale (1) to assess clinical scales; 2) characterize dementia using brain imaging, perfusion brain SPECT, and laboratory tests including Alzheimer's disease cerebrospinal fluid biomarkers and APOE4 genetic determinants. Results: Fourteen patients fulfilled the diagnostic criteria for dementia. Seven were diagnosed with possible or probable behavioral-variant frontotemporal dementia, two with probable Alzheimer's disease, two with probable vascular dementia (including one due to CADASIL), one with CNS inflammatory disease, and six could not be fully characterized. Conclusions: The diagnosis of dementia in middle-aged patients with schizophrenia is challenging but possible, using a multistep procedure. The most frequent condition, bvFTD, could reflect the presence of an evolutive neurodegenerative process in some patients.
